Chimney and flue systems

Condensing flue connection in refurbished chimneys!

Chimney refurbishment with SUR stainless steel chimney (1998)

SUR plastic pipe element (2015)

SUR plastic flue system for CHP systems in a stainless steel chimney.

Ultra-precise adjustment/centring with adjustable chimney base

Lubricate the seal, insert – click – and finished!

Threads are difficult or impossible to install in tight spaces. Therefore SUR has developed a connection with clamping function for the support bend!

This allows pipes of any length and with the correct diameter to be simply pushed in until they engage.

Note: Ensure sufficient lubrication of the seal!

The chimney base allows ultra-precise adjustment/centring of the components.
